Problem

Existing blockchains:

- Slow
- Require intensive computation power
- Hard to difficult scale
- Not secure

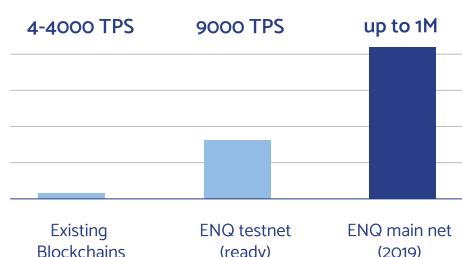

Our solution

- TRINITY hybrid consensus algorithm to make the system secure and decentralized. Working on computers, smart devices and smartphones

- Easy-to-build secure smart contracts on Java Script and Petri networks
- Easy to implement into business processes or Dapps

Enecuum's network performance continues to improve as additional devices connect

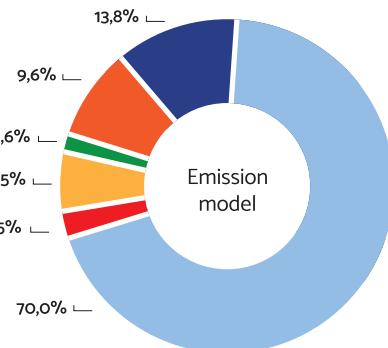

ENQ Tokenomics

ENQ - utility token to access network functionality and reward TRINITY miners for transaction verification and smart contract publishing.

Emission model

70,0% ■ Miners
1,5% ■ Advisory & Consulting
4,5% ■ Team
0,6% ■ Airdrop
9,6% ■ Reserve fund
13,8% ■ Token Sale

Enecuum is the world's first blockchain to unite millions of smartphones and connected devices into a single network – fast, secure and fully decentralized. We bring blockchain to everyone.

Private token sale only

KYC required

- Soft cap USD 5,967,562
- Hard cap USD 23,870,246.40
- 1 ENQ =USD 0,04

Stage 1 30 Sep 2018	Stage 2 21 Oct 2018	Stage 3 31 Oct 2018
USD 5 967 561.6	USD 13 128 635.52	USD 4 774 049.28
Early adopters, partners and funds	Strategic partners and funds	Private contributors and community participants

Key benefit for big stakeholders of Stage 1 and Stage 2 :

Participation in PoS mining network (3rd stage of TRINITY consensus algorithm)

Team and advisors

More than 35 team members in 3 locations:

- Mike SAYFULLIN** - Co-Founder, CEO
Serial entrepreneur IT, Web, Marketing
- Jev VAINSTEINS** - CBDO
Canonical Ubuntu, Huawei, Cogent
- Sergey BEZZATEEV**
Professor, Doctor of Science in Cryptography
- Jason YEE** - CFO | BNP Paribas, JP Morgan, National Australia Bank
- Ivan V. IVANOV** - Co-Founder
Serial entrepreneur | Upstudy, Yukuma, ee24
- Ran NEU NER** - Advisor, Onchain Capital, CNBC Cryptotrader Show Host
- Hen TEKLE** - Advisor, Alphachain Capital, Blockchain pioneer
- Shelly Hod MOYAL** - Advisor, Co-Founder iAngels, iCapital
